RE: Docket 50-142  
UCLA REACTOR

Memo to Board and Parties:

Enclosed please find CBG's direct testimony for the upcoming safety hearings.

Please note that Exhibits C-I-7 through C-I-10, and C-III-8, are not included herein because they were previously filed in CBG's summary disposition responses. Exhibit C-I-11 is likewise not being enclosed because it is presumed all participants have copies; if that is not the case, please notify us. Exhibits C-I-12 and -13 are the basic film footage of BORAX and SPERT; if parties do not otherwise have access to them and desire previewing, please let us know.\*

Note that two witnesses have been included to address the accident consequence matter recently included by the Board in the upcoming hearing. Note also that CBG still has been unable to confirm Professor Warf's availability. We were able to confirm before CBG's direct case was moved to October that Dr. Warf was not available in July. He remains hard to reach, in the Far East; we only know that he is returning to this country sometime this fall, but the precise time expected back is not known at this time.

Note also that because of uncertainties as to specific availabilities during the three weeks of hearings scheduled for four months from now, it is expected that some of the proposed panelists will not in fact testify with particular panels, due to scheduling conflicts that cannot be anticipated so far in advance. For that reason, the panels have been specifically constructed so that loss of a particular witness should not affect the ability of the panel to address the matters at hand, as there is a considerable cross-over. Panel chairpersons will be announced when availabilities are more clear.
