419/259-5221

Harold R. Denton, Director
Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Denton:

Enclosed are two sets of the Davis-Besse Nuclear Power Station, Unit 1, Emergency Plan and Procedures, issued by the Toledo Edison Company. Federal Register, Volume 47, No. 249, (Tuesday, December 28, 1982) identifies a change to 10 CFR Part 50, which allows a licensee to reduce the number of copies of emergency plans and procedures issued to the NRC.

In compliance with this regulation, we are replacing Control Copies 50A through 50J of the Davis-Besse Emergency Plan and Procedures presently in your possession. In their place, we are re-issuing Control Copy 50A and 50B. Please return the previously issued control copies so that they may be destroyed, per our procedures for controlled documents.

The Plan itself has had no revision and procedure revisions which occurred during the transition period have been incorporated. The new sets are complete and up-to-date as received.

If you have any questions in this matter, please contact Judith Hirsch, Emergency Planning Supervisor, at (419)259-2377.

Very truly yours,

RPC
