PRAIRIE ISLAND NUCLEAR GENERATING PLANT
Docket Nos. 50-282 License Nos. DPR-42
50-306 DPR-60

License Amendment Request dated July 1, 1983
Chlorine Detection and Recombiner Systems Technical Specification Changes

Attached are three originals and 37 conformed copies of a request for a change of Technical Specifications, Appendix A, of Operating Licenses DPR-42 and 60. Attached is one copy of the License Amendment class determination and a check in the amount of \$9,600 for the fee.

This submittal proposes changes to sections of the Technical Specifications. The three major changes:

- 1) TS 3.6 & TS 4.4 Containment System Recombiners.
- 2) TS 3.13 & Table TS 4.1-1 Control Room Air Treatment System.
- 3) Table TS.4.1-1 - Reference to FSAR table.

Exhibit A contains the proposed changes, reasons for the change and Significant Hazards Evaluations. Exhibit B contains the revised Technical Specification pages. Exhibit C is an abbreviated version of FSAR Table 7.7-2. It cross references the items in Table 7.7-2 to the corresponding items in the Technical Specifications.

We believe none of the requested changes constitute a Significant Hazards consideration since they do not:

- 1) involve a significant increase in the probability or consequences of an accident previously evaluated; or
- 2) create the possibility of a new or different kind of accident from any accident previously evaluated; or
- 3) involve a significant reduction in a margin of safety.
