Director of Nuclear Reactor Regulation  
ATTN: Mr. J. F. Stolz, Chief  
Operating Reactors Branch #4  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

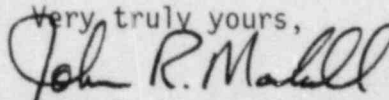

SUBJECT: Arkansas Nuclear One - Unit 1  
Docket No. 50-313  
License No. DPR-51  
Withdrawal of Proposed Technical  
Specification

Gentlemen:

As a result of a review of our proposed Technical Specification changes submitted to NRC, AP&L has determined that two of our proposed changes are no longer required.

The first proposed Technical Specification change was requested on December 3, 1976, (1CAN127601) and concerned Low Temperature Overpressure Protection. As a result of subsequent review and modifications discussed in our letter of November 18, 1982, (1CAN118202) this change is no longer required. Therefore, we hereby request that the proposed Technical Specification change be withdrawn from consideration.

The second proposed Technical Specification change was requested by NRC as a result of IE Bulletin 79-05A, IE Bulletin 79-05B and the Order of May 17, 1979, and was submitted February 12, 1980, (1CAN018016). In conversations with Mr. Vissing of your staff, it has been determined that this change is no longer required. Therefore, we request that the proposed Technical Specification change submitted February 12, 1980, be withdrawn from consideration.

Very truly yours,  
  
John R. Marshall  
Manager, Licensing
