Washington, D.C. 20555

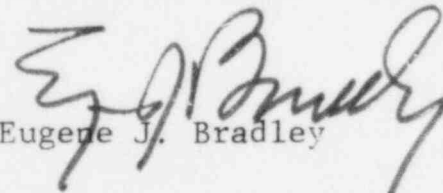

Re: Peach Bottom Atomic Power Station
Units 2 & 3 - Docket Nos. 50-277 & 50-278

Dear Mr. Denton:

Enclosed for filing with the Commission are 3 originals and 19 copies of an Amendment to Philadelphia Electric Company's December 22, 1977 Application for Amendment of Facility Operating Licenses DPR-44 and DPR-56.

This Amendment revises the Company's earlier application and prior amendments thereto relating to revisions to the Peach Bottom Units 2 & 3 Technical Specifications associated with a plant modification to provide a second level of undervoltage protection for safety related systems. The enclosed Amendment to the earlier application reflects the current design of the undervoltage protection system and the results of discussions between and evaluations by the NRC Staff and the Licensee.

Very truly yours,

Eugene J. Bradley
