PRAIRIE ISLAND NUCLEAR GENERATING PLANT  
Docket Nos. 50-282 License Nos. DPR-42  
50-306 DPR-60

Revision No. 1 to License Amendment Request dated June 24, 1983  
LOCA Analysis

Attached are three originals and 37 conformed copies of a revision to a request for a change of Technical Specifications, Appendix A, of Operating Licenses DPR-42 and 60.

This submittal proposes changes to Figure TS.3.10-5 of the Prairie Island Technical Specifications. Additional information will be submitted by August 12 which will discuss the effect on off-site doses of the increase in peak pellet exposure to 55 GWD/MTU. Unit 2 cycle 8 or Unit 1 Cycle 9 are not expected to exceed 51 GWD/MTU peak pellet exposure.

Exhibit A describes the proposed change, reason for change, and safety evaluation. Exhibit B contains the revised Appendix A page. Exhibit C contains corrections to the XN-NF-83-38 report.
