Office of Nuclear Reactor Regulation
Attention: Mr. D. B. Vassallo, Chief
Operating Reactors Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Radiological Effluent Technical Specifications (RETS)
Cooper Nuclear Station (CNS)
NRC Docket No. 50-298, DPR-46

Reference: (1) NRC letter from D. B. Vassallo to J. M. Pilant,
dated May 18, 1983, same subject

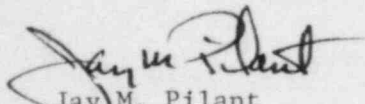

Dear Mr. Vassallo:

Reference (1) transmitted a copy of Draft 7" of Revision 3, NUREG-0472, "Standard Radiological Effluent Technical Specifications for Pressurized Water Reactors", and requested that the District develop a final submission of RETS for Cooper Nuclear Station using the Draft as guidance. The submittal was requested within 60 days of receipt of the letter.

Due to the current extended outage at the Cooper Nuclear Station the District has experienced a delay in completing the development and review of the proposed submittal. Accordingly, we respectfully request an extension of 30 days in which to respond to Reference (1).

Please contact my office if you have any questions regarding this request.

Sincerely,

Jay M. Pilant
Technical Staff Manager
Nuclear Power Group
