SUPPLEMENTAL REQUEST FOR LICENSE AMENDMENT  
NUREG-0737 TECHNICAL SPECIFICATIONS

Dear Mr. Vassallo:

By letter dated June 23, 1983 (Serial: LAP-83-227), Carolina Power & Light Company submitted proposed revisions to the Technical Specifications (TS) for the Brunswick Steam Electric Plant, Unit Nos. 1 and 2. Those revisions concerned TS requirements for certain NUREG-0737 items covered by the NRC's Generic Letter No. 83-02 dated January 10, 1983.

As recently discussed with the NRR Project Manager, it has been noted that Brunswick-1 and Brunswick-2 TS pages for Item 9, isolation of HPCI and RCIC modification (NUREG-0737 Item II.K.3.15) were inadvertently omitted during mailing of the submittal. Enclosed are forty (40) copies of the revised TS pages relating to the above referenced item.

Should you need any additional information, please contact our staff.

Yours very truly,

S. R. Zimmerman  
Manager
