

UNITED STATES NUCLEAR REGULATORY COMMISSION

NORTHERN STATES POWER COMPANY
MONTICELLO NUCLEAR GENERATING PLANT

Docket No. 50- 263

REQUEST FOR AMENDMENT TO
OPERATING LICENSE NO. DPR-22

(License Amendment Request Dated August 9, 1977)

Northern States Power Company, a Minnesota corporation, requests authorization for changes to the Technical Specifications as shown on the attachments labeled Exhibit A and Exhibit B. Exhibit A describes the proposed changes along with reasons for the change. Exhibit B is a set of Technical Specification pages incorporating the proposed changes.

This request contains no restricted or other defense information.

NORTHERN STATES POWER COMPANY

By

L. J. Wachter
L J Wachter

Vice President, Power Production &
System Operation

On this 9th day of August, 1977, before me a notary public in and for said County, personally appeared L J Wachter, Vice President, Power Production & System Operation, and first being duly sworn acknowledged that he is authorized to execute this document in behalf of Northern States Power Company, that he knows the contents thereof and that to the best of his knowledge, information and belief, the statements made in it are true and that it is not interposed for delay.

Margaret W. Olson

EXHIBIT A

MONTICELLO NUCLEAR GENERATING PLANT DOCKET NO. 50-263

License Amendment Request Dated August 9, 1977

Proposed Change to Technical Specifications Appendix A, of Provisional Operating License DPR-22

Pursuant to 10CFR50.59, the holders of Provisional Operating License DPR-22 hereby propose the following change to Appendix A Technical Specifications:

Specification and Bases 3.8/4.8 - Radiation Environmental Monitoring Program

PROPOSED CHANGES

Replace Table 4.8.1 (Page 2 of 4 only), Sample Collection and Analysis, Monticello Nuclear Generating Plant, Radiation Environmental Monitoring Program with the proposed Table 4.8.1 (Page 2 of 4 only) as contained in Exhibit B. This change eliminates clam sampling from the program.

Incorporate a proposed replacement Figure 4.8.1 and delete Figure 4.8.2 (Page 174).

Incorporate minor identification changes on the following pages: iv, vii, ix and 168.

REASON FOR CHANGES

Since the beginning of the environmental monitoring program, which includes two years of preoperational sampling and six years of operational sampling, extensive searching for clams both upstream and downstream of the plant has met with little or no success. Fast stream conditions and limited areas conducive to clam production create the absence of clams in this stretch of the river. We conclude the time spent in clam searching is not productive.

Proposed Figure 4.8.1 identifies both control and indicator sampling locations on the same map. It provides for easier comprehension of all sampling locations. The information shown on Figure 4.8.2 is incorporated in Proposed Figure 4.8.1.

The word "Radiation" added to the program title differentiates this program from the ecological study programs.

SAFETY EVALUATION

These changes involve no hazards considerations. The radiation environmental monitoring program is adequate to provide necessary supporting evidence for assessing the performance of the plant with respect to keeping population exposures as low as reasonably achievable.

EXHIBIT B

License Amendment Request Dated August 9, 1977

This exhibit consists of the following pages revised or removed to incorporate the proposed Technical Specification change:

iv
vii
ix
168
170
173
174 (removed)
