ULNRC-2413

Gentlemen:

CALLAWAY PLANT  
DOCKET NUMBER 50-483  
CALLAWAY PUMP AND VALVE INSERVICE TESTING PROGRAM

Reference: R.B. Samworth letter to D.F. Schnell dated  
September 21, 1990

This letter transmits Revision 12 of the  
Callaway Pump and Valve Inservice Testing (IST) Program.  
Attachment 1 is a brief description of the changes, and  
Attachment 2 contains a copy of revised pages which  
should be inserted into the existing program. NRC staff  
approval of this submittal is requested by September 1,  
1991 so that some of these changes may be implemented  
during the Refuel V outage which is scheduled to begin in  
March, 1992.

Please note that this submittal contains  
discussion on an alternative testing technique. The  
alternative technique described herein has been reviewed  
against the recommendations of NRC Generic Letter 89-04  
and has been found to be an acceptable testing method.  
The use of alternative techniques was addressed by NRC in  
the referenced letter.

Changes to the Callaway IST Program are subject  
to the fee provisions of 10CFR170. Therefore, Union  
Electric will accept charges incurred as a result of the  
NRC review. If you have any questions concerning this  
submittal, please contact me.

Very truly yours,

  
Donald F. Schnell
