Docket No.: 50-338
License No.: NPF-4

Gentlemen:

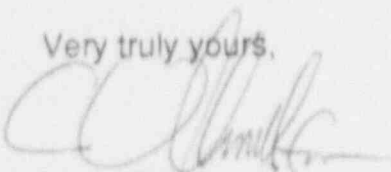

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNIT 1
INSERVICE INSPECTION SUMMARY REPORT
FOR THE 1991 REFUELING OUTAGE

As set forth in the provisions of ASME Section XI, enclosed is the Inservice Inspection Report for North Anna Power Station Unit 1 for the 1991 refueling outage. This report is a summary of examinations performed during the outage to satisfy the requirements for the second inservice inspection interval. The North Anna Unit 1 second inspection interval, first period, ends on December 24, 1992.

In accordance with IWA-6220 of the 1983 Edition of ASME Section XI, Summer 1983 Addenda, a Form NIS-1, Owner's Report for Inservice Inspections, is provided with this report as Attachment I, the results of the steam generator tube inspections are provided as Attachment II, and the NIS-2 Forms, Owner's Reports of Repair and Replacement, are provided as Attachment III.

Should you require more detailed information, the entire report will be maintained on file at the station and the corporate office.

Very truly yours,

W. L. Stewart
Senior Vice President - Nuclear
