Technical Specifications Change RequestREFERENCE: Letter from G. A. Hunger, Jr., (PECo) to
U. S. Nuclear Regulatory Commission dated
April 1, 1993

Dear Sir:

In the above referenced letter, Philadelphia Electric Company (PECo) submitted, in accordance with 10 CFR 50.90, Technical Specifications Change Request (TSCR) No. 93-01 which requested a change to Appendix A of the Peach Bottom Facility Operating Licenses. These changes implement an expanded operating domain for PBAPS, Units 2 and 3. The technical analyses associated with this change are the ARTS/MELLLA (Average Power Range Monitor, Rod Block Monitor, Technical Specifications Improvements/Maximum Extended Load Line Limit Analysis) analyses.

PECo hereby requests that our original submittal be revised such that the submitted Unit 2 pages 4, 20, and 140b, and Unit 3 pages 4 and 9 be deleted and replaced with the attached revised Unit 2 pages 4, 20, and 140b, and Unit 3 pages 4 and 9. These pages are being revised to incorporate previously approved amendments and minor administrative changes.

This issue was discussed between Tom Loomis (PECo) and Joe Shea (NRC) on August 17, 1993.

We have determined that this revision does not alter our evaluation of any of the 10 CFR 50.59 standards, and therefore, does not affect our conclusion that TSCR 93-01 does not constitute an unreviewed safety question. We have also concluded that the proposed revision does not affect the Information Supporting a Finding of No Significant Hazards Consideration and the Information Supporting an Environmental Impact Assessment.

If you have any questions, please contact us.

Very truly yours,
