September 26, 1978

Mr. Boyce H. Grier, Director  
Office of Inspection & Enforcement  
U.S. Nuclear Regulatory Commission  
Region I  
631 Park Avenue  
King of Prussia, Pennsylvania 19406

Docket No. 50-317  
License No. DPR-53

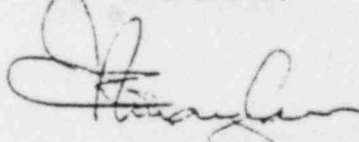

Dear Mr. Grier:

Per Environmental Technical Specification 5.6.2.a, please find attache  
LER 78-43/4T.

The prompt (24-hour) report of this occurrence was delayed by one day because of the marginal classification of this event as an unusual occurrence. This event does not meet any of the environmental impact criteria for an unusual occurrence and probably is not of public interest due to the relatively low numbers of fish as compared to other reported occurrences. However, this event has been classified as an unusual occurrence because of the relatively large numbers of this species impinged as compared to previous experience (only 1212 individual fish in 1273 one hour collections from 1975 through 1977). Because of the nature of the event and time required to make a decision as to its unusual nature, the prompt report was delayed for one day.

Should you have questions regarding this report, we would be pleased to discuss them with you.

Very truly yours,

R. M. Douglass  
Chief Engineer
