Arlington, Texas 76011

Subject: Final Report - Investigation of  
Low Strength 90-day Concrete  
Test Cylinders 50-482

Dear Mr. Seidle:

In my letter to you dated August 15, it was indicated that the final report of our investigations of low strength 90-day concrete test cylinders would not be available before the end of September. This letter is to indicate our current status and our schedule for preparation of a final report.

As of September 29 all reports have been received from Portland Cement Association. This information is being transmitted to our Architect/Engineer for review and evaluation. It is expected that all actions will be complete and a final summary report will be transmitted to you by October 27.

We will keep you informed if unforeseen events cause the above indicated schedule to change.

Yours very truly,

*Glenn L. Koester*
