EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0	2	On August 3 at 0300 hours, the zone 1-23 smoke detector in the upper cable spreading																																																																														
0	3	room was deactivated via the security computer due to spurious alarms where no smoke																																																																														
0	4	or fumes were present. The smoke detector is required to be operable by T.S.3.3.7.9.																																																																														
0	5	The event is being reported pursuant to T.S.6.9.1.13.b.																																																																														
0	6																																																																															
0	7																																																																															
0	8
