NUREG-0737 Item II.B.3

Post Accident Sampling System

Reference: (A) NRC letter dated August 9, 1982 "Post  
Accident Sampling System" Re: Pilgrim  
Nuclear Power Station

(B) BECo Letter 82-172, dated June 9, 1982

Dear Sir:

Reference (A) requested Boston Edison Company to provide a schedule for responding to the information request for post implementation review of the Post Accident Sampling System.

Reference (B) advised that Boston Edison's planned implementation is December 30, 1983. Upon completion, the information requested in Reference (A) will be assembled and available for submittal approximately February 1984.

The "further information" provided in Reference (A) although considered an expansion to the specific clarifications already provided for NUREG 0737, warrants consideration in some cases and as such, will be reviewed for applicability to our proposed modifications and procedural implementation. Technically justified alternatives however will not be provided beyond the original NUREG 0737 clarifications.

We trust this letter is responsive to your needs. Should you require any additional information on this subject, please do not hesitate to contact us.

Very truly yours,

*A. V. Morisi*
