**Subject:** Request for additional information for NRC License No. 21-16560-01 (CN616871)

Dear Mr. Reeve:

This refers to the license amendment request dated October 30, 2019 from JAN X-Ray Services, Inc., NRC License No. 21-16560-02. Based on the letter, we understood that you requested to remove four field stations. If there has been no history of leaking radioactive material sources at those locations, please provide a statement that no leaking sources have ever been identified at field stations located at 3033 Sage Drive, South Boardman, Michigan, 49680; 3714 Boston Street, Midland, Michigan, 48642; 9697 230th Avenue, Reed City, Michigan, 49677; and 11177 S. Singhurt Street, Terre Haute, Indiana, 47802 under NRC License No. 21-16560-01.

In addition, you requested to add three new field stations. Please provide the diagrams or aerial images for each location and specify the locations where licensed material storage will be located (please note that the storage should not be in a public area (such as public road)) and a brief description how the licensee will ensure the radiation levels surrounding the storage area in compliance with the radiation limit for the public members set forth in the NRC regulations (100 mR a year and 2 mR per any hour in unrestricted areas).

Please provide a response by December 19, 2019 and please indicate Mail Control No. 616871 in the response to facilitate proper mail handling in our office. You could fax the response with a cover letter signed and dated by the licensee management to 630-515-1078.

If you have any question or need any clarification regarding the above, please contact me at 630-829-9623 or reply to this email.

Thank you.
