September 24, 1982

Mr. A. Schwencer, Chief  
Licensing Branch #2  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: LaSalle County Station Units 1 and 2  
Wetwell to Drywell Vacuum Breakers  
NRC Docket Nos. 50-373 and 50-374

Reference (a): License NPF-11, Amendment 4,  
Condition 2.C.(32), Vacuum Breaker  
Valves.

(b): C. W. Schroeder letter to A.  
Schwencer dated August 26, 1982.

Dear Mr. Schwencer:

Reference (a) states, "Prior to November 1, 1982, the licensee shall complete a test and shall submit its evaluation of the results which confirm the capability of the vacuum breaker valves to withstand the opening and closing forces associated with the pool swell." During the discussion with the NRC, it was indicated that the NRC desired pre-notification of the actual test performance so that the NRC would have the opportunity to observe the test. The purpose of this letter is to inform you that the test schedule has been revised from Reference (b). It is now scheduled to begin at 10:00 a.m. on Friday, October 15, 1982, at:

NUTECH TESTING SERVICES  
2344 B Walsh Avenue  
Santa, Clara, California

If there are any questions in this matter, please contact this office.

Very truly yours,

*CW Schroeder 9/24/82*

C. W. Schroeder  
Nuclear Licensing Administrator
