Director of Nuclear Reactor Regulation
United States Nuclear Regulatory Commission
Attn: Mr. Steven A. Varga, Chief
Operating Reactors Branch No. 1
Division of Licensing
Washington, DC 20555

Reference: Beaver Valley Power Station, Unit No. 1
Docket No. 50-334, License No. DPR-66
Proposed Change Request No. 36, Revision 3 to Operating License

Gentlemen:

Enclosed are:

1. Three (3) originals and thirty-seven copies of a revision to an Application for Amendment to Operating License, DPR-66, to amend Appendix A of our license to revise Technical Specifications concerning Radiological Effluent Specifications.
2. Forty (40) copies of documents designated Attachments A and B which set forth the requested change in Technical Specifications and its safety evaluations.

The ODCM and Appendix B are to be part of this submittal and will be submitted following onsite review. Changes that were made during our internal review process have been sent to Franklin Research Center for their review.

We have determined this to be a revision to an existing change request, therefore, no fee is required. We further request that the effective date of these specifications be delayed until the ODCM implementing procedures, computer programming and training have been completed.

Very truly yours,

J. J. Carey
Vice President, Nuclear
