EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 On October 5, 1982, during a containment surveillance, a small service water leak of

0 3 approximately 0.5 GPM was discovered on the cooling coils of No. 22 Containment Fan

0 4 Coil Unit (CFCU). The unit was isolated and immediate notification of the NRC was per-

0 5 formed. No. 22 CFCU was declared inoperable and since No. 21 CFCU was already inoperable,

0 6 Action Statement 3.6.2.3.b was entered. Both containment spray systems were operable.

0 7 The event constituted abnormal degradation of containment in accordance with Technical

0 8 Specification 6.9.1.8.c. (82-112, 82-111, 82-109, 82-101, 82-100)

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 The leakage was due to erosion of the cooling coils by silt in the service water. The

1 1 leaking coil was repaired utilizing Belzona metal filler and the action statement was

1 2 terminated. New design coils will be installed during the next refueling.
