Re: Northern Indiana Public Service Company
Bailly Generating Station, Nuclear-1
Docket No. 50-367
Site Restoration Plan

Dear Mr. Denton:

Pursuant to the May 6, 1982 Order of the Atomic Safety and Licensing Board which terminated the proceedings on the application of Northern Indiana Public Service Company (NIPSCO) for the extension of Construction Permit CPPR-104, attached herewith is NIPSCO's Notice of Final Site Inspection which will be conducted on November 16, 1982, following the completion of the site restoration work.

Copies of this Notice are being sent to each of the individuals and organizations appearing on the service list as of May 6, 1982, in the above-referenced proceeding.

Yours very truly,

EMS/dgg

NOTICE OF FINAL SITE INSPECTION

To All Parties of Record as of May 6, 1982, In the Matter of Northern Indiana Public Service Company (Bailly Generating Station, Nuclear-1), Docket No. 50-367 (Construction Permit Extension)

On May 6, 1982, the Atomic Safety and Licensing Board (Board) entered an order in Docket No. 50-367 terminating the proceeding on the application of Northern Indiana Public Service Company (NIPSCO) for extension of Construction Permit No. CPPR-104 for the Bailly Generating Station, Nuclear-1 project (Bailly). That order required NIPSCO to implement its amended site restoration plan and to send quarterly reports on the progress of the work to all parties of record. The order further provided:

"8. That, on April 15, 1983 and at the completion of the site restoration (but no later than September 1, 1983, if not completed), NIPSCO is to give notice of, and arrange for, an inspection of the site (under reasonable conditions) between 10 and 20 days thereafter, at which each party, if an individual, or one representative from each organization party (even if intervening jointly with other organizations), along with one expert for each such party (if the party so desires), may be present;

9. Each party participating in the site inspections may conduct reasonable inspection and testing activities which do not interfere with ongoing site restoration. If the parties cannot agree on what inspection or testing activity is reasonable, the NRC Staff will make the final decision;"

An interim site inspection was conducted on October 18, 1982. At that time the site restoration work was more than 50 percent complete and work was progressing substantially ahead of schedule. In its September 1, 1982 site restoration progress report NIPSCO

estimated that all site restoration work would be completed by December 31, 1982. Because of unexpected good weather and better than expected progress on the project, NIPSCO now has reasonable assurance that the site restoration work will be completed not later than November 15, 1982.

NIPSCO is therefore scheduling the required final site inspection to be held following the completion of the site restoration work for November 16, 1982, at 1:30 o'clock p.m. All persons permitted by the May 6, 1982 Board order to participate in such inspection, and who desire to do so, must contact either Mr. Mark T. Maassel or Mr. William R. Elliott on or before November 15, 1982. Each party should identify the name of their representative who will attend the site inspection, the name, firm affiliation and area of expertise of any expert who will accompany the party's representative, the extent of their participation in the inspection including any testing or special inspection which the representative or expert may wish to conduct, and a telephone number where the representative may be reached. Upon receipt of this information, arrangements will be made with Bailly security personnel to permit those named individuals attending the final site inspection to enter the Bailly site.

Individuals wishing to attend the final site inspection may provide the necessary information to Mr. Mark T. Maassel by calling (219) 874-4231, extension 383 or Mr. William R. Elliott at (219) 874-4231, extension 328; or by mailing such information to either

of them at Northern Indiana Public Service Company, Plant Engineering and Construction, 591 Marquette Mall Office Building, 450 St. John Road, Michigan City, Indiana 46360. Provided, however, any information forwarded by mail must be received by Mr. Maassel or Mr. Elliott on or before November 15, 1982, so that necessary arrangements may be made with Bailly security personnel for your entry to the Bailly site.
