Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, Suite 3100
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

BELLEFONTE NUCLEAR PLANT UNITS 1 AND 2 - TOLERANCE FOR TUBULAR STEEL CABLE
TRAY HANGERS - BLRD-50-438/81-47, BLRD-50-439/81-50 - SEVENTH INTERIM
REPORT

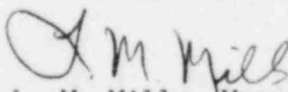

The subject deficiency was initially reported to NRC-OIE Inspector
R. V. Crlenjak on July 16, 1981 in accordance with 10 CFR 50.55(e) as
NCR 1478. This was followed by our interim reports dated August 14 and
November 9, 1981 and January 21, April 14, May 24, and July 26, 1982.
We expect to submit our next report by March 17, 1983.

As a result of TVA's investigations to determine the cause of this
deficiency, additional related deficiencies have been discovered. Con-
sequently, since the disposition of the deficiencies cited in NCR 1478 have
already been approved by TVA, NCR 2056 is being initiated to document the
additional deficiencies and is to be included as part of this 50.55(e) item.
TVA will specify the cause and the actions required to prevent recurrence
when the disposition is complete on both NCR's.

If you have any questions concerning this matter, please get in touch with
R. H. Shell at FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
Nuclear Licensing
