Division of Licensing
Licensing Branch No. 2
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Perry Nuclear Power Plant
Docket Nos. 50-440; 50-441
Containment Design

Dear Mr. Schwencer:

The design requirements of the containment annulus concrete for the Perry Nuclear Power Plant was the subject of a letter dated August 16, 1982, and a meeting on September 23, 1982. During this meeting, members of the Structural Engineering Branch requested additional information prior to their review of the design.

This letter forwards a revision of the report submitted under the August 16, 1982 letter. The report is titled "Containment Annulus Concrete Design, Construction and Testing". This revision incorporates the additional information requested in the September 23, 1982 meeting. The revised sections are appropriately marked to reflect the areas of concern.

If you have any questions, please contact my staff.

Very truly yours,

Dalwyn R. Davidson
Vice President
System Engineering and Construction
