Mr. T. M. Novak  
Assistant Director of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

SUBJECT: Waterford 3 SES  
Public Information Booklet

Reference: W3P82-3273 dated October 22, 1982

Dear Mr. Novak:

Enclosed, for your information, are the rough "proofs" of the October 21 draft revised booklet text provided to you with the referenced letter.

As discussed in the reference letter, the revised text is being incorporated into a printer's proof which is required to be submitted to the ASLB by November 12, 1982. In view of this tight schedule, we have indicated the minor changes from the October 21 text by vertical bars in the margin of the proofs, to facilitate review and comment by the Staff and FEMA on the schedule discussed in the referenced letter.

If you have comments, please contact Robert Azzarello of the Nuclear Project Support Group at 504/363-8783.

Yours very truly,

*L. V. Maurin*
