Subject: Implementation of the Emergency Response Data System

Gentlemen:

Toledo Edison is pleased to inform you that the Davis-Besse Nuclear Power Station has completed its voluntary implementation of the Emergency Response Data System (ERDS). Successful final testing of this system was conducted with the Nuclear Regulatory Commission (NRC) ERDS contractor (NUS Corporation, EI Division) on January 15, 1991.

Appropriate Davis-Besse Emergency Plan implementing procedures adequately address activation and deactivation of the ERDS. Should the NRC issue an ERDS final rule, Toledo Edison will review this rule against the ERDS program in place at Davis-Besse for potential modifications to the program.

In the unlikely event of an emergency at the Davis-Besse Nuclear Power Station, the ERDS would be activated upon activation of the Davis-Besse Technical Support Center (TSC), coincident with an emergency classification of Alert or above.

Should you have any questions or require any additional information, please contact Mr. Robert W. Schrauer, Manager - Nuclear Licensing, at (419) 249-2366.

Very truly yours,
