Perry Nuclear Power Plant  
Docket No. 50-440  
Response to NRC Regulatory  
Effectiveness Review Report  
(TAC No. 77996)

Gentlemen:

As noted in the December 21, 1990 NRC letter transmitting the results and conclusions of the Regulatory Effectiveness Review (RER) for PNPP, the team concluded that the level of performance of most of the elements of the Security Program were very good and were indicative of competent and diligent program management. However, several areas of the program were identified which could be changed to further improve the safeguards programs.

The Safeguards Attachment to this letter provides a response to each of the findings of the report, except for those findings identified simply as observations, as requested in the December 21, 1990 NRC letter. The Attachment contains Safeguards Information of a type specified in 10CFR73.21, and must be protected against unauthorized disclosure.

If you have any questions, please feel free to call.

Sincerely,

*Michael D. Lyster*  
Michael D. Lyster
