Subject: Arkansas Nuclear One - Unit 1
Docket No. 50-313
License No. DPR-51
Notification of Delayed Commitment Completion

Gentlemen:

Licensee Event Report (LER) 50-313/94-001 reported an Emergency Feedwater flowpath inoperable longer than allowed by Technical Specifications. As a corrective action to this LER, ANO committed to discuss the lessons learned regarding routine, repetitive tasks with appropriate ANO-1 and ANO-2 Maintenance, Chemistry, Radiation Protection, and System Engineering personnel by March 15, 1994. This action was completed, however, 11 of 467 individuals reviewed the information after the scheduled completion date. The last required individual completed the committed review on March 17, 1994. The commitment schedule deviation was self-identified during the normal item close-out review.

As discussed in our March 29, 1994, teleconference with Mr. Tom Stetka of NRC Region IV, ANO expects that commitments will be completed on or before their established due dates. This expectation was reemphasized by the Vice President, ANO Operations during the daily "Plan of the Day" meeting on April 8, 1994 and by a memorandum issued April 26, 1994 to ANO Department Heads, and Supervisors.
