

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

JAN 28 2020

Christina R. Allen, M.P.H.  
Radiation Safety Officer  
Monsanto Company  
Mail Zone R3B  
800 North Lindbergh Boulevard  
St. Louis, MO 63167

Dear Ms. Allen :

Enclosed is Amendment No. 6 to your NRC Material License No. 24-32488-01 in accordance with the letter dated October 22, 2019, received in our offices on December 16, 2019 (ML19350C523) ("the letter").

We noted that, on the NRC Form 313 attached to the letter, in Item 2, the name of your company is given as "Monsanto co./Bayer Co," which is different than the name we have been using on your license, in accordance with your previous statements.

Has your corporate name changed? If so, please contact me to discuss the information needed to amend the license in this regard. Please contact me at (630) 829-9841. My fax number is (630) 515-1078 and my email address is [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov). Please note that simply sending us an email will not resolve our inquiry.

If your corporate name has not changed, please explicitly state as much in your next amendment request to resolve our inquiry.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9807 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with

licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".

Colleen Carol Casey
