Mr. John F. Stolz, Chief
Operating Reactor Branch #4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Crystal River Unit 3
Docket No. 50-302
Operating License No. DPR-72
Environmental Qualification of Safety-Related
Electrical Equipment

Dear Mr. Stolz:

Pursuant to your letter dated June 5, 1981, and our letter dated July 17, 1981, Florida Power Corporation hereby provides an item-by-item evaluation of safety-related electrical equipment included in our submittals of April 21, June 30, and October 31, 1980. Also, our response addresses questions and statements in your Safety Evaluation Report dated June 5, 1981.

The information documented in these two reports entitled, "Safety Evaluation Response" and "Qualification Summary", provides the basis for the continued safe operation of Crystal River Unit 3 where qualification of safety-related electrical equipment is concerned. Therefore, based upon the above, it is our intention to proceed in good faith to implement the necessary commitments in an orderly fashion coincident with future refueling outages.

Very truly yours,

Dr. P. Y. Baynard
Dr. P. Y. Baynard
