JOHN S. KEMPER
VICE-PRESIDENT
ENGINEERING AND RESEARCH

NOV 10 1981

Mr. Robert L. Tedesco
Assistant Director for Licensing
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: Limerick Generating Station, Units 1 & 2
Safety Concerns Associated with Pipe Breaks
in the LWR Scram System
Docket No. 50-352 and 50-353

Dear Mr. Tedesco:

In accordance with a telephone conversation between G. D. Calkins (NRC Division of Licensing) and I. B. Pyrih of our staff on October 14, 1981, we are hereby providing the 45 day response to your April 30, 1981 letter to E. G. Bauer, Jr.

It is our position that the three requests for generic evaluation made in the April 30 letter were adequately fulfilled by the General Electric Company report NEDO-24342, entitled "GE Evaluation in Reponse to NRC Request Regarding BWR Scram System Pipe Breaks", dated April 1, 1981. This report was transmitted to the NRC by letter from Glenn G. Sherwood (GE) to D. G. Eisenhower (NRC) on April 30, 1981.

In accordance with the reference telecon, our 120 day response will be submitted by February 10, 1982. We also note that plant specific responses conforming to the guidance contained in NUREG-0803 were requested in a letter from D. G. Eisenhower (NRC) to all BWR Licensees on July 7, 1981. Therefore, anticipating this same requirement for Limerick, our 120 day response will address the requirements of NUREG-0803 "Generic Safety Evaluation Report Regarding Integrity of BWR Scram System Piping" published in August 1981.

Should you have any questions, please contact us.

Sincerely,

John S. Kemper
