USNRCUNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSIONBEFORE THE ATOMIC SAFETY AND LICENSING BOARD'81 OCT 27 P2:56
PDOFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

In the Matter of)

TEXAS UTILITIES GENERATING)
COMAPNY, et al.)Docket Nos. 50-445
50-446(Comanche Peak Steam Electric)
Station, Units 1 and 2)(Application for
Operating Licenses)CFUR'S SUPPLEMENTAL ANSWERS TO NRC STAFF'S
FOLLOWING INTERROGATORIES: 9-1, 9-7, 9-8, 9-9, 9-11

Citizens for Fair Utility Regulations, "CFUR", hereby submit their supplemental answers to the following interrogatories submitted by NRC Staff:

ANSWERS

- 9 - 1 What is meant by CFUR is that "Applicant has failed to make adequate efforts to maintain radioactive exposures and releases of radioactive materials in effluents to unrestricted areas as low as reasonably achievable."
- 9 - 7 The function of the following variables: content of release; conditions of release; meteorological transport factors; ecological transport factors; and population characteristics.
- 9 - 8 Majority of the total body person-rem and person thyroid-rem exposure. That distance which will include ninety-five percent (95%) of total cumulative body person-rem and person thyroid-rem exposure.
- 9 - 9 The following may cause effects outside of the exclusion boundary: meteorological factors (e.g. wind, temperature), ecological factors (e.g. intake by livestock or fish), plant uptake; intake by human population.
- 9 - 11 (a) Yes. There is a total absence of any data which attempts to minimize the effect of radioactive releases on the general public outside of the exclusion boundary.
(b) Since there is a total absence of this data, no section can be identified.

There is some confusion here as the primary part of this interrogatory asks about the ER-OL while the subparagraph (b) asks about the FSAR.

Respectfully submitted,

J. MARSHALL GILMORE
