President Ronald Reagan
The White House
Washington, DC. 20500

Mr. President

It is understood that the Diablo Canyon may be built on a fault. If this is true, would it be dangerous for the Nuclear Power Plant to begin its mission? Is there a process by which one could check the safety of the foundation on which it is built?

I am concerned about this situation and I would like to be reassured that everything has been checked. Would you please send me information concerning the Nuclear Power Plant?

Thank you for your time and consideration.

Respectfully

Marilyn Wyss
