OFFICE OF SECRETARY  
DOCKETING & SERVICE  
BRANCH

116 Star Route  
Santa Margarita, CA 93453  
October 26, 1981

Nunzio Palladino  
Chairman  
US Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Palladino:

We are currently and have been for twenty years residents of San Luis Obispo County.

We are terrified by the prospect of living so close to a nuclear plant whose location lies so near an earthquake fault. We realize good men are doing everything they can to prevent a catastrophe in the event of an earthquake on the Hosgri fault.

In retrospect good men of good intentions who designed the earthquake-proof federal building in El Centro, California, learned a few years back that their calculations were incorrect.

Now, in view of the recent revelations regarding the Diablo facilities' two major design flaws, we strongly and respectfully urge you and your commission to order a special review of all safety systems to be performed by independent safety consultants before permitting the facility to go into production.

Sincerely,

A handwritten signature in dark ink, appearing to read "Roy &amp; Margaret Ferguson".

Roy & Margaret Ferguson

P.S. Of course, it may be only our lives at stake.
