File No. G9.33.4

Mr. Darrell G. Eisenhut, Director
Division Of Licensing
U. S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
Washington, D. C. 20555

Dear Mr. Eisenhut:

This letter is in response to Generic Letter 81-32, "NUREG-0737, Item II.K.3.44 - Evaluation of Anticipated Transients Combined With Single Failure," dated August 7, 1981. Generic Letter 81-32 requested all Applicants and Licensees to verify that the assumptions and initial conditions used in the General Electric (GE) BWR Owners Group generic analyses for item II.K.3.44 are representative for the River Bend Station.

Gulf States Utilities Company has reviewed the analyses assumptions and initial conditions used for the generic analyses with GE and determined that they are representative for River Bend Station.

Sincerely,

William J. Booker
