Joseph Mendrie,

I was pleased to hear today's announcement, that the N.R.C. revoked the Diablo Canyon license. I continue to feel that this PGE project is dangerous to the health & lives of Californians. I wish, that instead of writing and spending more money on improvements & repairs on Diablo Canyon, that this time and money could be used to develop a conversion project to convert Diablo Canyon.

We do not need nuclear power or weapons in this world.

I am glad the N.R.C. is demanding a re-examination of Diablo - and I hope this will allow time for citizens to become more aware of the dangers involved in nuclear energy.

Sincerely,

Carole C. Nelson
