Gentlemen:

In the Matter of)	Docket Nos. 50-327
Tennessee Valley Authority)	50-328

SEQUOYAH NUCLEAR PLANT (SQN) - TECHNICAL SPECIFICATION (TS) CHANGE 89-36 -
ADDITIONAL INFORMATION

Reference: TVA letter to NRC dated October 5, 1989, "Sequoyah Nuclear Plant
(SQN) - Technical Specification (TS) Change 89-36"

Based on telephone conversations between Jack Donohew of your staff and SQN Regulatory Licensing, TVA is submitting a change to the wording proposed for TS 3/4.2.4 and minor changes to the justification and significant hazards evaluation as provided in the referenced letter. The enclosed pages, which contain the revised wording, supersede those contained in the enclosures of the referenced letter. The basic reason and justification for the change as well as the Environmental Impact and Significant Hazards Evaluations previously submitted in the referenced letter remain valid. They were essentially based on the fact that the change was simply a relocation of existing requirements. In fact, the original proposal inadvertently introduced some different requirements. The revised submittal eliminates these different requirements and therefore conforms with the original intent of the change. The revised change also deletes a requirement that could not be implemented because of plant hardware design and other technical specification requirements.
