Dear Sir:

Three Mile Island Nuclear Station, Unit (TMI-1)
Operating License No. DPR-50
Docket No. 50-289
Tendon Surveillance

The fifteenth year tendon surveillance (Inspection Period 5) for TMI-1's Reactor Building was begun in October, 1989 and completed satisfactorily in January, 1990. In accordance with Technical Specification 4.4.2.1.6, GPUN is required to submit a report to the NRC by April 10, 1990. The contractor's final report was received on March 9, 1990 however we have not yet completed the additional review and evaluations that will be needed for our submittal. Therefore, we are requesting an extension until May 11, 1990 to submit our complete report.

Sincerely,

H. D. Hukill
Vice President and Director, TMI-1
