Washington, D. C. 20555

Gentlemen:

River Bend Station - Unit 1
Docket No. 50-458

Gulf States Utilities has discovered an editorial omission in our letter dated March 30, 1990 (RBG-32605) which had submitted a revision to our license amendment request to remove cycle specific parameter limits from the Technical Specifications. Enclosure 1 to that letter contained the requested technical specification revisions. One of those technical specifications, specification 3/4.2.1, Average Planar Linear Heat Generation Rate, had been incorrectly marked up. A corrected copy of this specification is attached; please substitute this corrected mark-up for the one that was provided in the March 30 submittal.

For further information, contact Mr. Barry M. Burmeister of my staff, at (504) 381-4148.

Sincerely,

W. H. Odell
Manager-River Bend Oversight
River Bend Nuclear Group
