License DPR-35
Docket 50-293

**NRC BULLETIN 90-02: LOSS OF THERMAL
MARGIN CAUSED BY CHANNEL BOX BOW**

By letter of March 20, 1990 the NRC requested all Boiling Water Reactor (BWR) licensees currently using channel boxes for a second fuel bundle lifetime to verify that current Critical Power Ratio (CPR) technical specification operating and safety limits are met for their BWR. The NRC also requested licensees using channel boxes for a second bundle lifetime to advise the NRC of the number and disposition of such bundles in the reactor core.

Pilgrim Nuclear Power Station (PNPS) does not currently use channel boxes for a second bundle lifetime; therefore, the NRC Bulletin 90-02 reporting requirements are not applicable to PNPS.
