SUBJECT: James A. FitzPatrick Nuclear Power Plant
Docket No. 50-333
Withdrawal of Amendment Application (JPTS-90-023)

- REFERENCES:
1. NYPA letter, R. E. Beedle to the NRC, dated November 19, 1991 (JPN-91-064), Proposed Changes to the Technical Specifications ASME Section XI and ESW Pump Surveillance Testing (JPTS-90-023).
 2. NYPA letter, W. Fernandez to the NRC, dated April 15, 1991 (JAFP-91-0228), "Update of the Status of Activities for the Emergency Service Water System."

Dear Sir:

The New York Power Authority withdraws the Technical Specification amendment application contained in Reference 1. The proposed changes would have revised the surveillance requirements associated with the Emergency Service Water (ESW) pump and incorporated the inservice inspection and testing of Section XI of the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code.

The Authority intends to submit a revised Technical Specification amendment application by June 30, 1993. This will satisfy a commitment to revise the ESW pump surveillance requirement (Reference 2).

If you have any questions please contact Mr. J. A. Gray, Jr.

Very truly yours,

Ralph E. Beedle
