Re: Cintichem Facility, Tuxedo, NY

Dear Mr. Orlando:

I am the Technical Director - Property Claims at American Nuclear Insurers. I am currently looking into the merits of a claim from Cintichem for recovery of costs associated with I-131 contamination and subsequent decontamination which manifested itself in October, 1989.

The purpose of my letter is to request from you and the NRC any information that may be available that would shed light on the following questions:

- 1) What were the sampling points and the results of those samples taken before the 1989 contamination?
- 2) What were the sampling points and the results of those samples taken after the 1989 contamination?
- 3) What was the source of I-131 discovered in S-4 in October, 1989?
- 4) What corrective action did Cintichem take?
- 5) What other paths of contamination were identified, if any, and what was done about them?
- 6) Has any contamination been identified since Cintichem ceased operations?

Your assistance in this matter is greatly appreciated. Should have any questions or need more information from me, please call me at (203) 561-3433, x-309.

Sincerely,

Robert H. Munger  
Technical Director, Property Claims
