3) Letter ET 91-0026 dated February 1, 1991, from F. T. Rhodes, WCNOG to the USNRC

Subject: Docket No. 50-482: Response to Request for Additional Information Regarding Transient Analysis Methodology Topical Report for the Wolf Creek Generating Station

Gentlemen:

This letter submits Wolf Creek Nuclear Operating Corporation's (WCNOG) response to comments received from the Nuclear Regulatory Commission (NRC) review of Reference 1. A draft of the Reference 1 response was discussed with the NRC on November 30, 1992. As a result of that review the NRC requested additional detailed discussion on three transients. The Attachment to this letter provides the additional details and incorporates comments received from the NRC in a February 10, 1993, telephone conference. The additional detailed discussion concerns WCNOG's "Transient Analysis Methodology for the Wolf Creek Generating Station" which was submitted in Reference 3.

A draft of this response was provided to the NRC on January 20, 1993 and comments were received in the February 10, 1993, telephone conference. As a result of comments received it was mutually agreed to provide this response by February 25, 1993.

As discussed in Reference 3, it is again respectfully requested that the Attachment to this letter be regarded as proprietary information, in accordance with the provisions of 10 CFR 2.790, and be withheld from public disclosure on the grounds that it contains trade secrets and confidential commercial information. The affidavit, which accompanied Reference 3, sets forth the basis by which this information should be withheld from public disclosure by the Commission and addressees.
