Richard,

I apologize, I had meant to ask for a copy of the 2018 report. Thank you for the reminder that the 2019 report is not yet due.

Hi Briana,

The 2019 Annual Incidental Take Report is currently being prepared and will be submitted by March 15th.

Richard

Richard,

Thank you for the notification. Would you be able to forward me a copy of Salem and Hope Creek's 2019 annual incidental take report? I apologize, but I am unable to locate it in my records. Thank you!

Subject: [External_Sender] Salem Generating Station - Incidental Take of Atlantic Sturgeon 01/31/2020

Pursuant to Biological Opinion NER-2010-6581, PSEG respectfully provides this preliminary notification regarding the incidental take of a deceased Atlantic sturgeon recovered from the trash bars at the Salem Generating Station cooling water intake. The specimen has been retained and frozen for further study pending direction from NOAA/NMFS. PSEG will provide the detailed Incidental Take Report and Data Collection Form as soon as available. Preliminary information regarding the incidental take is as follows:

Species Identification:	Atlantic Sturgeon (<i>Acipenser oxyrinchus</i>)
Site of Collection:	Salem Generating Station cooling water intake trash bars
Date Collected:	01/31/2020
Time Collected:	1100
Condition:	Deceased
Length:	118.8 cm TL

**SALEM AND HOPE CREEK GENERATING STATIONS
BIOLOGICAL OPINION NER-2010-6581
2018 ANNUAL INCIDENTAL TAKE REPORT-STATION & REMP**

The U.S. Nuclear Regulatory Commission (USNRC) and the National Marine Fisheries Service (NMFS) concluded formal consultation under Section 7 of the Endangered Species Act of 1973, as amended, (ESA) on July 17, 2014, with NMFS's issuance of a final biological opinion and incidental take statement (ITS) for Salem Nuclear Generating Station, Units 1 and 2 (Salem), and Hope Creek Generating Station, Unit 1 (Hope Creek). USNRC Amendment Nos. 308 and 290 to Renewed Facility Operating Licenses DPR-70 and DPR-75 for the Salem Nuclear Generating Station, Unit Nos. 1 and 2, and USNRC Amendment No. 198 to Renewed Facility Operating License NPF-57 for the Hope Creek Generating Station incorporating provisions of the incidental take statement became effective at the Salem and Hope Creek Generating Stations (Station) on the date of issuance, June 17, 2015. Pursuant to Terms and Conditions (T&C) Nos. 9 and 23 of the ITS, this report is being provided to detail interactions with Endangered Species Act (ESA) listed species at the Salem and Hope Creek Generating Stations for the 2018 reporting year.

In accordance with T&C #9 of the ITS, Table 1 summarizes the sturgeon and sea turtle interactions at the Station for the previous reporting year. Tables 2 and 3 provide information regarding the collection under each category specified in the ITS. The single collection of an Atlantic sturgeon during impingement sampling of the traveling screen wash water is likely an isolated incident and cannot be extrapolated to estimate a total annual take. There were no additional sightings of sturgeon or sea turtles in the vicinity of the Station that require reporting under the ITS.

During the 2018 reporting year, there were no interactions with a listed Endangered Species Act (ESA) species during Radiological Effluent Monitoring Program (REMP) sampling. Table 4 is submitted in satisfaction of T&C #23 of the ITS.

Table 5 of this report contains records of trash rack inspection dates and times for the seven days prior to each take listed in Table 1. As demonstrated by these records, PSEG routinely inspects the trash bars at least once per shift. No observations of threatened and endangered species were noted during these inspections. None of the sturgeon or sea turtles listed in Table 1 was recovered from the water surface where they would have been observed during routine inspections.

PSEG submitted incident reports and sturgeon data reporting forms for each collection as specified in the ITS. The previously submitted reports contain additional detail and photographs for all collected specimens. Due to the poor condition of the one recovered sea turtle, no necropsy was performed.

PSEG requests direction from the NMFS on disposition on the sturgeon fin clips that have been collected pursuant to the ITS T&C #7 and #28. NMFS directed shipment of fin clips to the U.S. Geological Survey Leetown Science Center in May 2018, but PSEG has not received any results from the genetic testing. PSEG can ship the additional 2018 fin clips to the USGS lab if so directed by NMFS. If no laboratory is available, please provide written confirmation regarding disposal of these stored samples.

PSEG confirms that we have renewed our arrangement with the Marine Mammal Stranding Center (MMSC) in Brigantine, New Jersey for 2019. PSEG will continue to rely upon the MMSC to provide any necessary assistance with the transport, evaluation, veterinary care, tagging and release of and future sea turtles recovered at the Station.

If you have any questions or require additional information, please do not hesitate to contact Ken Strait at (856) 339-3929.

Sincerely,

Charles V. McFeaters
Vice President - Salem

**SALEM AND HOPE CREEK GENERATING STATIONS
BIOLOGICAL OPINION NER-2010-6581
2018 ANNUAL INCIDENTAL TAKE REPORT-RIVER MONITORING**

The U.S. Nuclear Regulatory Commission (USNRC) and the National Marine Fisheries Service (NMFS) concluded formal consultation under Section 7 of the Endangered Species Act of 1973, as amended, (ESA) on July 17, 2014, with NMFS's issuance of a final biological opinion and incidental take statement (ITS) for Salem Nuclear Generating Station, Units 1 and 2 (Salem), and Hope Creek Generating Station, Unit 1 (Hope Creek). USNRC Amendment Nos. 308 and 290 to Renewed Facility Operating Licenses DPR-70 and DPR-75 for the Salem Nuclear Generating Station, Unit Nos. 1 and 2, and USNRC Amendment No. 198 to Renewed Facility Operating License NPF-57 for the Hope Creek Generating Station incorporating provisions of the incidental take statement became effective at the Salem and Hope Creek Generating Stations (Station) on the date of issuance, June 17, 2015. Pursuant to Terms and Conditions (T&C) No. 34 of the ITS, this report is being provided to detail interactions with Endangered Species Act (ESA) listed species that occurred while performing routine bottom trawl and beach seine sampling in the Delaware River during 2018 in accordance with the Salem Generating Station New Jersey Pollutant Discharge Elimination System (NJPDES) Permit.

PSEG's biological monitoring contractor, Environmental Consulting Services, Inc., collected two (2) Atlantic sturgeon, and two (2) Shortnose sturgeon while performing routine bay wide bottom trawl sampling as required by Salem Station's NJPDES Permit (**Table 1**). All collected specimens were alive and quickly released back into the Delaware River. PSEG submitted incident reports and sturgeon data reporting forms for each collection as specified in the ITS. The previously submitted reports contain additional detail and photographs for all collected specimens.

03/15/2019

PSEG requests direction from the NMFS on disposition on the sturgeon fin clips that have been collected pursuant to the ITS T&C #7 and #28. NMFS directed shipment of fin clips to the U.S. Geological Survey Leetown Science Center in May 2018, but PSEG has not received any results from the genetic testing. PSEG can ship the additional 2018 fin clips to the USGS lab if so directed by NMFS. If no laboratory is available, please provide written confirmation regarding disposal of these stored samples.

If you have any questions or require additional information, please do not hesitate to contact Ken Strait at (856) 339-3929.

Sincerely,

A handwritten signature in black ink, appearing to read "C.V. McFeaters", with a long horizontal line extending from the end of the signature.

Charles V. McFeaters
Vice President - Salem
