Gentlemen:

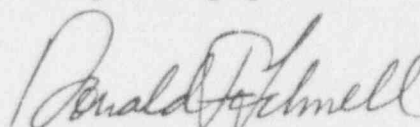

CALLAWAY PLANT
DOCKET NUMBER 50-483
REVISION TO TECHNICAL SPECIFICATION 3/4.7.8
SNUBBERS

Union Electric Company herewith transmits an application for amendment to Facility Operating License Number NPF-30 for the Callaway Plant. This amendment involves a revision to Technical Specification 3/4.7.8 Surveillance Requirement 4.7.8.d to allow a one-time schedule extension for the snubber transient event inspection. As described in the attached Safety Evaluation, the surveillance inspection is due to be performed by June 14, 1993; therefore we request your review and approval of this by this date.

The Callaway Plant On-Site Review Committee and the Nuclear Safety Review Board have reviewed and approved this amendment application. Attachments 1 through 5 provide the Technical Specification changes, Safety Evaluation, Significant Hazards Evaluation, and Environmental Consideration, respectively. We have concluded that this amendment application does not involve an unreviewed safety question as defined in 10CFR50.59, nor a significant hazard consideration as determined per 10CFR50.92.

If you have any questions concerning this amendment application, please contact us.

Very truly yours,

Donald F. Schnell
