WCNOC to NRC

Subject: Docket No. 50-482: 1992 Semiannual Radioactive
Effluent Release Report Revision

Gentlemen:

This letter provides revised pages for the 1992 Semiannual Radioactive Effluent Release Report for Wolf Creek Generating Station (WCGS). This revision is necessary to incorporate omissions discovered in Section II, Effluent and Waste Disposal Semiannual Report (1992) Solid Waste Shipments, of the Reference.

Allied Technology Group Inc., erroneously reported to WCGS the amount of two waste shipments buried at the U.S. Ecology Richland site. The first was reported as 161.0 cubic feet. This number represents the total volume of waste buried at that time, of which 149.2 cubic feet was WCGS material. The remaining 11.8 cubic feet was fill material from another waste generator. The second shipment was reported to WCGS as 151.5 cubic feet. It should have been reported as 143.5 cubic feet.

WCGS personnel omitted 74 cubic feet of dry active waste due to an administrative error. Quadrex Corporation sends WCGS monthly statements for dry active waste and WCGS compiles the information every six months. During compilation for the Reference one monthly report was omitted.

The above errors have been corrected, and revised values are reflected in "bold face" letters on the attached pages.
