Gentlemen:

River Bend Station - Unit 1  
Docket No. 50-458

Please find enclosed Revision 3 to Licensee Event Report No. 91-003 for River Bend Station - Unit 1. Previous submittals of this LER stated that the lead maintenance planners would review every maintenance job plan package prior to issuance to the field. GSU has found that other program requirements have been effective in preventing engineered safety feature actuations during maintenance. The lead planners review selected job plan packages, oversee the quality of maintenance work orders produced by their groups, and are responsible to identify trends and/or programmatic issues. Accordingly, GSU is revising its original commitment requiring the lead planners to review every maintenance job plan package. This revision has been discussed with Mr. Ward Smith of NRC Region IV. Should you require additional information, please contact Mr. David Lorfing of GSU at (504)-381-4145.

Sincerely,

J.E. Booker  
Manager - Safety Assessment  
and Quality Verification  
River Bend Nuclear Group
