CONTROL ROOM EMERGENCY VENTILATION SYSTEM TECHNICAL SPECIFICATION AMENDMENT
(NRC TAC NOS. M85143 AND M85144)

Gentlemen:

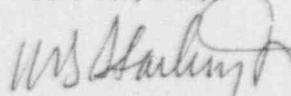

By letter dated March 1, 1993 (Serial No. NLS-93-061), Carolina Power & Light Company (CP&L) submitted typed Technical Specification pages for the proposed amendment to the Control Building Emergency Ventilation Technical Specifications. The purpose of this letter is to transmit revised pages for the proposed amendment, superseding the pages in the March 1, 1993 letter in entirety. The revised pages reflect the administrative changes discussed with the NRC staff on March 16, 1993. Marked-up pages of the current Control Room Ventilation System Technical Specifications for both units are also included in this letter.

In addition to the changes associated with the Control Room Emergency Ventilation System amendment issuance, it is CP&L's understanding that the NRC will be issuing an administratively corrected page 3/4 3-34 for Unit 2 Amendment 191. A typed page for that correction is included in this submittal.

Enclosure 1 provides page change instructions for incorporating the proposed revisions into the Technical Specifications. Typed Unit 1 and Unit 2 Technical Specification pages are provided herein as Enclosures 2 and 3, respectively. Enclosures 4 and 5 provide the marked-up pages of the current Technical Specifications for Unit 1 and Unit 2, respectively.

Please refer any questions regarding this submittal to Mr. D. B. Waters at (919) 546-3678.

Yours very truly,

R. B. Starkey, Jr.
