SUBJECT: James A. FitzPatrick Nuclear Power Plant  
Docket No. 50-333  
**Fire Protection Program**  
**Battery Charger Operating Temperature Qualification Report**

Reference: 1. NYPA letter, R. E. Beedle to the NRC, dated December 22, 1992, (JPN-92-072) regarding the Fire Protection Program Battery Charger Operating Temperature Qualification Report.

Attachments: 1. Analysis "Re-Rating of Battery Chargers for New York Power Authority James A. FitzPatrick Nuclear Power Plant", Revision 4, March 3, 1993, Power Conversion Products Inc.

2. Documentation of Changes to Analysis

Dear Sir:

In Reference 1 the Authority transmitted two reports on the temperature qualification of the FitzPatrick station battery chargers. Subsequently, the Authority was informed that the copyright symbol and the copyright statement on Attachment II to Reference 1 made it impossible to place the document in the NRC Public Document Room.

The Authority contacted the vendor and the analysis was reissued without the copyright symbol and without the copyright statement and with minor editorial changes. Attachment 1 to this letter supersedes and replaces Attachment II included with Reference 1, with changes from the previous submittal indicated by revision bars. The reasons for the changes are discussed in Attachment 2 to this letter.

If you have any questions, please contact Mr. J. A. Gray, Jr.

Very truly yours,

A handwritten signature of Ralph E. Beedle in dark ink.

Ralph E. Beedle
