NIAGARA MOHAWK POWER CORPORATION) Docket No. 50-410
)
Nine Mile Point Nuclear Station Unit No. 2)

APPLICATION FOR AMENDMENT

TO

OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, Niagara Mohawk Power Corporation, holder of Facility Operating License No. NPF-69, hereby requests that Section 6.9.1.9 of the Technical Specifications set forth in Appendix A to that License be amended. The proposed change has been reviewed in accordance with Section 6.5 of the Technical Specifications.

The proposed change to the Technical Specifications is set forth in Attachment A to this application. Section 6.9.1.9, "Core Operating Limits Report," is being proposed for revision to incorporate changes to General Electric's approved analytical techniques. The change will permit use of the SAFER/GESTR-LOCA methodology approved by the Staff for accident analyses.

The proposed change would not authorize any change in the types of effluents or in the authorized power level of the facility. Supporting information and analyses which demonstrate that the proposed change involves no significant hazards consideration pursuant to 10CFR § 50.92 are included as Attachment B.

WHEREFORE, Applicant respectfully requests that Appendix A to Facility Operating License No. NPF-69 be amended in the form attached hereto as Attachment A.
