Attn: Document Control Desk

Subject: Quad Cities Station Units 1 and 2
Withdrawal of Application for Amendment to Facility
Operating Licenses DPR-29 and DPR-30, Appendix A,
Technical Specifications
NRC Docket Nos. 50-254 and 50-265

Reference: (a) Letter from R. Stols (CECo) to T.E. Murley (NRC),
dated September 30, 1991.

In the Reference (a) letter, Commonwealth Edison (CECo) proposed to amend Section 3.10/4.10 of Appendix A, Technical Specifications to Facility Operating Licenses DPR-29 and DPR-30. The proposed change involved a rewrite of the Refueling section of the Technical Specifications and was submitted as part of an overall Technical Specification Upgrade Program (TSUP).

The purpose of this letter is to formally withdraw the proposed amendment Reference (a) for Quad Cities Station. New amendment requests, combined with identical Dresden Station amendment requests, are being submitted as part of a Technical Specification Upgrade Program at both Quad Cities and Dresden Stations.

March 25, 1993

The new amendment requests will be patterned after the original Quad Cities submittal, but will more closely follow the guidelines presented in NUREG-0123, Revision 4. In addition, the proposed amendments will make the Quad Cities and Dresden Technical Specifications identical within equipment and design limitations.

Please direct any questions you may have regarding this matter to this office.

Sincerely,

John L. Schrage
Nuclear Licensing Administrator
